Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1,6,10 are rejected under 35 U.S.C. 102(e) as being anticipated by Swoboda et al. (USPN 7043418B2).

The applied reference has a common assignee with the instant application.

Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention “by another,” or by an appropriate showing under 37 CFR 1.131.

3. As per claim 1, Swoboda et al. discloses a trace packet unit, the trace packet unit reformatting trace packets into export trace packets in column 10, line 45 – column 11, line 5; and a flush packet unit, the flush packet unit generating a flush export trace packet when the trace packet unit does not have sufficient data to generate a trace export packet in column 11, lines 6-18.

Art Unit: 2113

4. As per claim 6, Swoboda et al. discloses reformatting trace packets into export trace packets in column 10, line 45 – column 11, line 5; and generating a flush export trace packet when the data from the trace packets do not provide a complete export trace packet in column 11, lines 6-18.

5. As per claim 10, Swoboda et al. discloses a processing unit in column 9, lines 53-54; a trace unit, the trace unit coupled to the processing unit, the trace unit gathering test and debug data from the processing unit, the trace unit formatting the test and debug data in trace packets in column 10, lines 25-37; and a trace export unit, the trace export unit in column 10, lines 42-47 including: a trace packet unit for converting trace packets to export trace packets in column 10, line 45 – column 11, line 5; and a flush packet unit for generating trace packets when the converting a trace packet does not result in a complete export trace packet in column 11, lines 6-18.

Allowable Subject Matter

6. Claims 2-5,7-9,11-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
